

Prequalified Plumbers List

Racine Water Utility Private Service Replacement Program

The following plumbers have successfully prequalified to perform work under the Utility's Private Service Line Replacement Program. The Utility does not guarantee the work of these plumbers, but has verified that these plumbers have the personnel and equipment needed to perform private service replacements. You may still hire a plumber who is not listed below, but they must prequalify with the Utility before gaining eligibility to take part in the program. The Utility highly recommends that you obtain at least 2 or 3 quotes before settling on a plumber.

ateamservicesllc@yahoo.com

Before performing any work, both Homeowners and Plumbers must complete and sign the form on the following page. The homeowner and plumber shall contract directly for the private service replacement, but the Utility will make direct payment to the homeowner's plumber. The form on the following page is an addendum to the agreement between the homeowner and plumber, and lists the conditions of the Utility's funding.

The maximum payment by the Utility will be \$3750 if the Homeowner only receives one quote.

Plumbers and Home Owners are encouraged to take pictures and document any existing cracks, imperfections, or damage prior to starting work. This should be done to protect both parties.
